85. A two-digit number exceeds the sum of the digits of that number by 18. If the digit at the unit's place is double the digit in the ten's place, what is the number?

(*a*) 24 (*b*) 42
(*c*) 48 (*d*) Data inadequate

86. The sum of the digits of a two-digit number is 15 and the difference between the digits is 3. What is the two-digit number?

(*a*) 69
(*b*) 78
(*c*) 96
(*d*) Cannot be determined
(*e*) None of these

87. A two-digit number is 7 times the sum of its two digits. The number that is formed by reversing its digits is 18 less than the original number. What is the number? **(R.R.B., 2006)**

(*a*) 42 (*b*) 52
(*c*) 62 (*d*) 72

88. If the digit in the unit's place of a two-digit number is halved and the digit in the ten's place is doubled, the number thus obtained is equal to the number obtained by interchanging the digits. Which of the following is definitely true? **(NMAT, 2005)**

(*a*) Sum of the digits is a two-digit number.
(*b*) Digit in the unit's place is half of the digit in the ten's place.
(*c*) Digit in the unit's place and the ten's place are equal.
(*d*) Digit in the unit's place is twice the digit in the ten's place.

89. In a two-digit number, if it is known that its unit's digit exceeds its ten's digit by 2 and that the product of the given number and the sum of its digits is equal to 144, then the number is **(C.B.I., 2003)**

(*a*) 24 (*b*) 26
(*c*) 42 (*d*) 46

90. A number consists of two digits. If the digits interchange places and the new number is added to the original number, then the resulting number will be divisible by **(S.S.C., 2003)**

(*a*) 3 (*b*) 5
(*c*) 9 (*d*) 11

91. The sum of the digits of a two-digit number is 9 less than the number. Which of the following digits is at unit's place of the number?

(*a*) 1 (*b*) 2
(*c*) 4 (*d*) Data inadequate

92. The difference between a two-digit number and the number obtained by interchanging the positions of its digits is 36. What is the difference between the two digits of that number? **(Bank P.O., 2003)**

(*a*) 3 (*b*) 4
(*c*) 9 (*d*) Cannot be determined
(*e*) None of these

93. The difference between a two-digit number and the number obtained by interchanging the two digits is 63. Which is the smaller of the two numbers? **(Bank P.O., 2003)**

(*a*) 29
(*b*) 70
(*c*) 92
(*d*) Cannot be determined
(*e*) None of these

94. The sum of the digits of a two-digit number is $\frac{1}{5}$ of the difference between the number and the number obtained by interchanging the positions of the digits. What is definitely the difference between the digits of that number?

(*a*) 5 (*b*) 7
(*c*) 9 (*d*) Data inadequate
(*e*) None of these

95. The number obtained by interchanging the two digits of a two-digit number is lesser than the original number by 54. If the sum of the two digit of the number is 12, then what is the original number? **(Bank P.O., 2009)**

(*a*) 28
(*b*) 39
(*c*) 82
(*d*) Cannot be determined
(*e*) None of these

96. The difference between a two-digit number and the number obtained by interchanging the digits is 36. What is the difference between the sum and the difference of the digits of the number if the ratio between the digits of the number is 1 : 2?

(*a*) 4 (*b*) 8
(*c*) 16 (*d*) None of these

97. In a two-digit positive number, the digit in the unit's place is equal to the square of the digit in ten's place, and the difference between the number and the number obtained by interchanging the digits is 54. What is 40% of the original number? **(Bank P.O., 2008)**

(*a*) 15.6 (*b*) 24
(*c*) 37.2 (*d*) 39
(*e*) None of these
