

Then, according to given information

$$185 = x + x + 2 + x + 4 + x + 6 + x + 8$$

$$\Rightarrow 185 = 5x + 20$$

$$\Rightarrow 5x = 185 - 20 = 165$$

$$\Rightarrow x = 33$$

$$\text{Highest number} = 33 + 8 = 41$$

- 133.** Let the numbers be a and b where $a > b$.

According to the questions,

$$a - b = 10 \quad \dots(i)$$

$$\text{And } \frac{a+b}{5} = 8$$

By cross multiplying, we get

$$\Rightarrow a + b = 40 \quad \dots(ii)$$

By subtracting equation (ii) from (i) we get

$$2b = 40 - 10 = 30$$

$$\Rightarrow b = \frac{30}{2} = 15$$

And from (i)

$$a = 10 + 15 = 25$$

$$\Rightarrow a = 23$$

EXERCISE

(DATA SUFFICIENCY TYPE QUESTIONS)

Directions (Questions 1 to 15): Each of the questions given below consists of a statement and/or a question and two statements numbered I and II given below it. You have to decide whether the data provided in the statement(s) is/are sufficient to answer the question. Read both the statements and

Give answer (a) if the data in Statement I alone are sufficient to answer the question, while the data in Statement II alone are not sufficient to answer the question;

Give answer (b) if the data in Statement II alone are sufficient to answer the question, while the data in Statement I alone are not sufficient to answer the question;

Give answer (c) if the data either in Statement I or in Statement II alone are sufficient to answer the question;

Give answer (d) if the data even in both Statements I and II together are not sufficient to answer the question;

Give answer (e) if the data in both Statements I and II together are necessary to answer the question.

- 1.** What is the two-digit number? (Bank P.O., 2008)

I. The difference between the two digits is 9.

II. The sum of the digits is equal to the difference between the two digits.

- 2.** What is the value of the two-digit number ab ?

I. The difference between its digits is 2.

II. The sum of its digits is 4. (M.A.T., 2005)

- 3.** What is the two-digit number where the digit at the unit's place is smaller?

I. The difference between the two digits is 5.

(Bank P.O., 2006)

II. The sum of the two digits is 7.

- 4.** How much is four-fifths of the number? (Bank P.O., 2009)

I. Three-fourths of the number is 2.5 less than its four-fifths.

II. Half of the number added to it is 75.

- 5.** What is the smaller of the two numbers?

I. The difference between these two numbers is one-third of the greater number.

II. The sum of these two numbers is 30.

- 6.** What is the two-digit number? (Bank P.O., 2009)

I. Sum of the digits is 6.

II. Digit in the ten's place is double the digit in the unit's place.

- 7.** What is the difference between the digits of a two-digit number? (M.A.T., 2007)

I. The sum of the digits of that number is 8.

II. One-fifth of that number is 15 less than half of 44.

- 8.** What is the three-digit number? (Bank P.O., 2008)

I. Two-fifth of that number is less than half of that number by 20.

II. One-fourth of that number is 25% of that number.

- 9.** What is the difference between two two-digit numbers? (Bank. P.O., 2010)

I. The square of the first number is 9 times the second number.

II. The ratio of the first number to the second number is 3 : 4.

- 10.** What is the third number of 8 consecutive real numbers? (M.A.T., 2001)

I. Product of the numbers is 34,459,425.

II. Sum of numbers is 84.

- 11.** What is the ratio between the two numbers?

I. The sum of two numbers is twice their difference.

II. The smaller number is 6.

- 12.** What is the two-digit number whose first digit is a and the second digit is b ? The number is greater than 9. (M.A.T., 2000)

I. The number is a multiple of 51.

II. The sum of the digits a and b is 6.

- 13.** What is the two-digit number? (SIDBI, 2006)

I. The sum of the two digits of the number is 13.

II. The number obtained by interchanging the two digits of the number is smaller than the original number by 45.

- 14.** What is the original number? (M.B.A., 2007)

I. Sum of the two digits of a number is 10. The ratio between the two digits is 1 : 4.
